Engineering Manager

BWS Manufacturing Ltd., manufacturer of BWS Trailers has an exciting opportunity for an **Engineering Manager** to plan, organize and direct engineering functions to meet company objectives for design, new product development and improvement of existing product lines. In this role you will utilize the full potential of Inventor 3D and AutoCad 2D and transportation industry standards across federal and provincial jurisdictions.

The work requires attention to detail. You must be a self motivated individual who can multi-task and resolve challenges. In this role you are a leader, have a keen eye and question the things that don't look right. The position requires a good understanding of the manufacturing process, engineering practices, and close contact with our production and sales teams to yield standard designs.

You are a results oriented person, with strong computer and time management skills with some experience working in a manufacturing environment and understand what designing is all about. You have an Engineering degree preferably with a professional engineering designation.

We offer great benefits and a pension plan. We provide on the job support and pay is commensurate with experience. Inquire with us today to start your new opportunity!

Please send a cover letter and resume to human.resources@bwstrailers.com .
